Geography Details

One among highest growing regions in Tamil Nadu. The coffees are dense and have a beautiful after taste because of the high growing Region. The high elevations are a characteristic of the ethiopian Highland and the arabica are termed as SHG - strictly high grown arabica coffees. The coffees are intercropped with oranges, cardamom, pepper and banana. The beans of the highest brix are identified the colour coded bands are given to workers at the estate to pick the cherries. Floats are removed and the coffee beans with little bit of mucilage is dried on simple rudimentary raised beds. They are exposed to morning sun for the first two days and then completely dried in shade for a period of 20-25 days. The roast is medium dark roast for an intense body, Spicy aroma, nutmeg undertones and a chocolate ganachy mouthfeel. The coffee has a prominent note of native spices and a low key acidity.

 coffee

Bye afternoon slumps,
Hello pretty food!
Afternoon tea,
3 ways

English High Tea **850**
